

I am a very satisfied subscriber of XM radio, and ask you to reject the NAB's petition 04-160. The Radio Broadcasters are becoming monopolistic by owning many stations in the same market, thereby limiting what the listeners in the region can hear. Now they are trying to limit Satellite radio, their competition. This is a clear violation of freedom of speech, and also would artificially reduce the free competition. All listeners (citizens) to radio and Satellite radio would suffer from the reduction in radio competition.

Sincerely,

Brooks Bollman
